

2024 25 MAIN CATALOGUE PROFESSIONAL

lavor.com

More strength, more power, more innovation.

This is what, day after day, forges the new Lavor brand and that is realized in our products, ambassadors of our philosophy through cutting-edge technical and quality features.

Why do we do it?

We want to be by your side ever more.

Simply

LAVORWASH

Lavorwash is worldwide leader in cleaning industry since 1975 and offers a wide and complete range of cleaning machinery suitable for any kind of applications, both indoor and outdoor relying on a fortyfour-year experience.

Over the years, Lavorwash has grown to become a specialist manufacturer of professional and household cleaning systems, acquiring

various leading brands and diversifying its own range to offer innovative products of excellence.

Lavorwash has production plants in Italy and around the world and nowadays it employs over 300 staff and has around 200 associates, with branches in several countries around the world such as France, the United Kingdom, Spain, Poland, Brazil and China.

Lavorwash is a company with a consolidated reputation at national and international levels. It operates locally through branches located around the world, delivering its products through importers, distributors, agent network and direct relations with large retailing chains

Efficiency, reliability, safety and ease of use are the basic factors for a careful selection of a professional product. On the ground of these standards, Lavor has conceived professional line high-pressure cleaners, in order to match, through high-tech products, perfect hygiene and clean with time/labour saving.

Being Manufacturers: from experience to knowledge

In the high-pressure cleaners market companies are divided in those who buy components to assemble products and manufacturers, who have a continuous R&D on all product components.

Lavorwash manufactures all the high-pressure cleaners components entirely and this allows: to spread product knowledge, culture and experience inside the company; to check the entire manufacturing cycle; to adopt possible improvements immediately; better sensitivity to market request adjusting product range design in real time.

What high pressure cleaner? Is it better pressure or delivery rate?

The right criteria to define the high-pressure cleaner performances is the washing effectiveness. The elements that influence this value are: delivery rate (water volume processed by the pump in a unity of time) and pressure (I/h water power on a surface). The higher the delivery rate, the faster the washing phase (less rinsing time); the higher the pressure, the deeper the washing (better dirt degreasing). It is often emphasized the pressure only (also because the pump size and the consequent manufacturing cost are cheaper), but delivery rate is as important as pressure.

What pump? Is it better a linear (crankshaft) or an axial one?

It does not exist a winning technology, because both solution can provide same performances and lifetime. What determines the pump quality is the quality of the project itself (linear or axial) and of the components used; for this reason Lavorwash decided to develop both technologies, taking into consideration a design that grants margin of safety and reliability.

Linear pump

The movement of the (3) pistons occurs through a system of connecting rods and crankshaft. The longitudinal axle of the pistons (placed at the same level or linear) is perpendicular to the motor rotation axle. It is more versatile to bear high delivery rates (from 21 l/min) and it has a better self priming.

Water cooled motor

Water flows through the Stainless steel coil around the motor, this allows a better thermal exchange (and so a cooling) than air also in those countries where inlet water could reaches 60°C. This allows a drop in operating temperature of the motor and pump mechanical elements, granting a better reliability and longer life.

• Thermal valve

When the gun trigger is released, the same water flows through the pump (by-pass) and it overheats and sooner or later this damages the valve seals. With this completely mechanical system, the thermal valve checks the temperature in the pump, opening/closing the by-pass circuit letting new and fresh water flow inside before the elements are damaged. Simple solution without electronic devices.

Total Stop

Releasing the gun trigger the pump stops automatically avoiding element damages during the by-pass phase. Pulling the trigger, the high-pressure cleaner starts automatically. Max pump protection.

Low voltage and delayed Total Stop

To avoid quick and multiple start and shut down of the motor/pump group whenever the gun trigger is pulled and released, this disposal delays the machine shut down of about 15 seconds. Prevention, energy saving, top safety and pump longer life.

Motor low rotation speed

The electric motor transfers the same number of revolutions to the pump. With a 4 poles motor there is a lower rotation speed of the components (1400 RPM in case of 50Hz or 1750 RPM in case of 60 Hz) granting longer pump life. Extending lifetime solution.

Pump with nickel-plated brass head

The nickel-plating treatment improves the basic features (greater hardness and improved resistance to the chemical products used in washing), reducing the deterioration caused by cavitation.

Mystic-R

CHARACTERISTICS

- Three steel pistons, brass axial pump head with built-in by-pass valve. Pump with double seal Total stop. Suction and delivery Stainless steel valves. Detergent built-in tank for indirect suction. Glicerine pressure gauge. Hose holder. Accessory holder. Ergonomic handle.
- Power cable 5 m

	Mystic-R 1409 XP
code	36084-00005
rated/max pressure	140/180 bar - 2030/2610 psi
max delivery flow rate	540 l/h - 2.4 gpm
abs. power/supply	2800 W/230V 1~50Hz
motor power	2,0 kW
pump model	MPBX1/2800 rpm
T max water inlet	40°C
dimension (cm)/weight	43x50x85/28 Kg (61,6 lbs)

PLUS

Axial motor pump with stainless steel pistons, brass head, double water seal

Glycerine bath pressure gauge to constantly monitor the operating pressure of the high pressure cleaner with reading guarantee

Integrated cleaning tank for indirect suction of the chemical product

Sturdy protective steel cover to protect the motor pump against accidental impacts

STANDARD EQUIPMENT

OPTIONAL

Alaska

CHARACTERISTICS

• Three steel pistons, brass axial pump head with built-in by-pass valve. • Pump with double seal • Total Stop. • Suction and delivery Stainless steel valves. • Detergent built-in tank for indirect suction. • Power cable holder. • Accessory holder. • Ergonomic handle. • 1lt detergent tank. • Power cable 5 m

	Alaska 1409 XP
code	36087-00001
rated/max pressure	140/180 bar - 2030/2610 psi
max delivery flow rate	540 l/h - 2.4 gpm
abs. power/supply	2800 W/230V 1~50Hz
motor power	2,0 kW
pump model	MPBX1/2800 rpm
T max water inlet	40°C
dimension (cm)/weight	35x40x87/28 Kg (61,6 lbs)

PLUS

Axial motor pump with stainless steel pistons, brass head, double water seal

Convenient and functional rotary switch for easy switching on and off

Integrated cleaning tank with a capacity of 1 litre for indirect suction of the chemical with a level visible from the outside

Robust structure that gives great stability to the high pressure cleaner during use

STANDARD EQUIPMENT

• 00080-02770 Lance M22.

OPTIONAL

• 00080-02957 Sandblasting lance

• 00080-03481
Turbo nozzle head

• 00080-02981
Turbo lance M22 - 0,35

Sand blasting lance M22 - 0,40

HKA

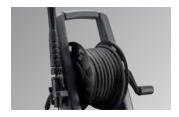

CHARACTERISTICS

- Three steel pistons, brass axial pump head with built-in by-pass valve. Pump with double seal Total Stop. Suction and delivery Stainless steel valves.
- Detergent built-in tank for indirect suction. Power cable holder. Hose reel in pressure. Accessory holder. Ergonomic handle. 11 detergent tank.

	HKA 1409 XP
code	36087-00006
rated/max pressure	140/180 bar - 2030/2610 psi

COLD VVATER

PLUS

Professional motor pump with 4-pole motor (1400 rpm) and self-priming linear pump: the low rotation speed significantly extends the life of the components inside the motor pump, guaranteeing greater efficiency and silence

Pressure regulating valve to vary the power of the water jet according to actual requirements

Total stop delayed and in low voltage: the device delays the shutdown of the high pressure cleaner by 15 seconds from the last release of the gun lever, for safety, energy saving and prevention of faults or overheating of the motor pump

Integrated cleaning tank with a capacity of 2.8 litres for indirect suction of the chemical product

STANDARD EQUIPMENT

(mod. 1211/1509)

• 00080-01695 Gun M22 -3/8 with rotating coupling (mod. 1713/2017)

- 00080-03188 Nozzle type 045 (mod. 1211)
- 00080-03185 Nozzle type 030 (mod. 1509)

Indo E

CHARACTERISTICS

• 4 poles electrical motor 12-15 hp with thermal protection • **Motor-pump with flexible joint** • Heavy duty structure with stainless steel covers • High filtering capacity cartridge suction brass filter • RW Triplex Premium pumps • Pressure gauge with stainless steel casing • **Hot water seals 4-poles (1400 rpm)** motor well oversized and protected with paint. Ø 300 wheels with brake • Highly professional unloader valve with external bypass • Timed Total Stop • Low voltage control panel • Contactor • Thermal relay motor protection • Hose reel with 20 m hose can be mounted on request (mod. 2521/3518) • Practical and safe housing accessories

On request 60Hz version

code	36113-00013
rated/max pressure	250/280 bar - 3625/4061 psi
max delivery flow rate	1080 l/h - 4.76 gpm
engine type	Honda GX 390
motor power	13 hp
pump model	CL5/1560 rpm
T max water inlet	60°C
dimension (cm)/weight	100x66x92/61 Kg (134 lbs)

PROFESSIONAL LINE HIGH PRESSURE CLEANERS

COLD WATER WITH COMBUSTION ENGINE

PLUS

Honda GX 390 – 13hp petrol engine with automatic decelerator

New CL 6.0 self-priming pump with three pistons in integral ceramic, double oil viewer and brass head. Speed reducer between motor and pump. New flanged pressure regulating valve L3.1, internal passages resized to ensure correct operation even in high operating flow conditions

Sturdy painted steel frame with side support for lance and gun housing

4 twin wheels for stable positioning and ease of movement

STANDARD EQUIPMENT

• 00080-03189 Nozzle type 050

• 00080-02347 High pressure hose 10 m

OPTIONAL

 Protective frame with lifting hooking (optional cod. 00071-03396)

 Hose reel optional cod. 10001-10245 (hose not included) in combination with protective frame. High pressure hose code: 00080-02258 10 m - 310 bar 00080-02261 20 m - 400 bar 00080-02262 20 m - 400 bar 00080-02263 10 m - 400 bar food industry

• 00080-02966 Lance Turbo type 1 M22 - 0,45 • 00080-02958 Sand blasting lance

Thermic 13 HF

CHARACTERISTICS

• Three ceramic pistons, brass linear pump head. • 1560 rpm reducer between engine and pump. • Automatic rpm regulation. • By-pass with safety valve. • Suction and delivery Stainless steel valves. • Unleaded gasoline engine 13 hp **Honda** GX 390. • Integrated detergent suction with external suction probe. • Pressure regulator. • Glicerine pressure gauge. • Heavy duty steel frame. • 6,5 l gasoline tank. • Suction hose with check valve (**optional** cod. 10002-12275).

• 00080-01226 Sand blasting lance

Why a hot water high-pressure cleaner?

industry has a perfect hygienising effect.

It is necessary the use of a hot water high-pressure cleaner whenever it is necessary to degrease oily or particularly tough dirt in the shortest time possible. Washing efficiency of hot water is much higher that the cold water one (up to 50% higher on some kind of dirt), because heat assists dirt degrease. Heat effect on the surface produce also fast drying. With the use of a hot water high-pressure cleaner it is possible to have: shorter washing time (under the same kind of dirt), better degrease of non water-soluble dirt, shorter drying time and less quantity of chemical product used: in few words, lower cleaning fixed costs and water saving.

The boiler

It is a diesel fuel heater that raises water temperature coming out of the pump; the difference between inlet and outlet water temperature is technically indicated like DeltaT.

Boiler dimensions, in other words coil and diesel fuel consumption, determine the thermal power of the burner.

Under the same conditions, increasing the delivery rate (quantity of water to be heated) the Delta T decreases proportionally. It is easy to understand why high pressure cleaners with higher delivery rates have more powerful burners: to grant the best operating temperature in each working condition. All our boilers have very high thermal efficiency, near 90% or higher. This means very low operating cost with reference to diesel fuel consumption.

Linear pump:

The movement of the (3) pistons occurs through a system of connecting rods and crankshaft. The longitudinal axle of the pistons (placed at the same level or linear) is perpendicular to the motor rotation axle. It is more versatile to bear high delivery rates (from 21 l/min) and it has a better self priming.

Water cooled motor:

Water flows through the Stainless steel coil around the motor, this allows a better thermal exchange (and so a cooling) than air also in those countries where inlet water could reaches 60°C. This allows a drop in operating temperature of the motor and pump mechanical elements, granting a better reliability and longer life.

• Thermal valve:

When the gun trigger is released, the same water flows through the pump (by-pass) and it overheats and sooner or later this damages the valve seals. With this completely mechanical system, the thermal valve checks the temperature in the pump, opening/closing the by-pass circuit letting new and fresh water flow inside before the elements are damaged. Simple solution without electronic devices.

• Total Stop:

Releasing the gun trigger the pump stops automatically avoiding element damages during the by-pass phase. Pulling the trigger, the high-pressure cleaner starts automatically. Max pump protection.

• Low voltage and delayed Total Stop:

To avoid quick and multiple start and shut down of the motor/pump group whenever the gun trigger is pulled and released, this disposal delays of about 15 seconds the machine shut down. Prevention, energy saving, top safety and pump longer life.

• Low voltage and delayed Total Stop with intelligent shut down: To avoid quick and multiple start and shut down of the motor/pump group whenever the gun trigger is pulled and released, this disposal delays of about 15 seconds the machine shut down. In case the machine is unused for more than 20 minutes or there are leakages in the pressure circuit, the machine shuts down automatically and completely: control panel power cut-off. Prevention, energy saving, top safety and pump longer life.

Motor low rotation speed:

The electric motor transfers the same number of revolutions to the pump. With a 4 poles motor there is a lower rotation speed of the components (1400 RPM in case of 50Hz or 1750 RPM in case of 60 Hz) granting longer pump life. Extending lifetime solution.

• Pump with nickel-plated brass head:

The nickel-plating treatment improves the basic features (greater hardness and improved resistance to the chemical products used in washing), reducing the deterioration caused by cavitation.

Darwin

CHARACTERISTICS

• Boiler ventilation unit built-on motorpump (energy saving) • Three ceramic coated pistons, brass axial pump head with built-in by-pass valve with double gasket • Suction and delivery Stainless steel valves • Vertical burner with high thermal efficiency steel coil • Temperature regulation gauge • Pivoting wheel with brake • Diesel pump with discharge by-pass valve • Detergent built-in tank (3,5 lt) for indirect suction • Possibility to integrated detergent suction with external probe • Diesel tank capacity (15 lt) • Glicerine pressure gauge • Metal lance • Accessory holder • Ergonomic handle • Integrated hose reel with 10m hp hose (only model Plus code 36093-00002)

PLUS

Handy pressure connected hose reel to use only the necessary length of hose and to easily rewind it after use (Plus 36093-00002 model)

Shockproof front and rear protective bar , ideal for manual lifting

Removable handle without the use of tools to compact or to facilitate transportation

Cleaning tank with suction quantity adjustment system, possibility of suction from external tank

STANDARD EQUIPMENT

• 00080-04943 Lance M22 high/low pressure

• 00080-03186 Nozzle type 035

00080-02254 High pressure hose 8 m (mod. 36093-00001)
 00080-04434 High pressure hose 10 m (mod. 36093-00002)

• Storage bag (mod. 36093-00001)

Dakota-R

CHARACTERISTICS

• Three ceramic coated pistons, brass axial pump head with built-in by-pass valve. • Low voltage and delayed Total Stop. • Suction and delivery Stainless steel valves. • Vertical burner with high thermal efficiency steel coil. • Temperature regulation gauge. • Low fuel lamp. • Safety valve. • Detergent built-in tank (4,2 lt) for indirect suction. • Pressure regulator. • Glicerine pressure gauge. • Panel with analogic controls. • Hose reel with brake (optional).

• 00080-02966 Lance Turbo type 1 M22 - 0,45

• 00080-02957 Sandblasting lance

Texas-R

CHARACTERISTICS

- 4 poles electrical motor (1400 rpm) with thermal protection. Three ceramic coated pistons (1 ph), full ceramic pistons (3 ph), brass linear pump head with built-in by-pass valve. Low voltage and delayed Total Stop. Suction and delivery Stainless steel valves. Vertical burner with high thermal efficiency steel coil.
- Temperature regulation gauge with high sensitive stainless steel sensor. Detergent built-in tank (4,2 lt) for indirect suction. Auxiliary motor for burner.
- Hose reel with brake (optional).

	Texas-R 1211 LP	Texas-R 1611 LP
code	36080-00002	36080-00004
rated/max pressure	120/150 bar - 1740/2175 psi	160/180 bar - 2320/2610 psi

• 00080-02957 Sandblasting lance

HLR three phase

Models: 1515 LP 2015 LP/2021 LP

CHARACTERISTICS

• 4 poles electrical motor (1400 rpm) with thermal protection and water cooling (except HLR 1614 LP model). • Three ceramic pistons, three ceramic coated pistons (mod. 1614 LP) • Built-in by-pass valve nickel plating brass linear pump head with high temperature water seals and bushing. • Integrated elastic joint, for best pump coupling (1614 Excluded). • Low voltage and delayed Total Stop. • Suction and delivery Stainless steel valves. • Vertical burner with high thermal efficiency steel coil. • Temperature regulation gauge with high sensitive stainless steel sensor. • Detergent built-in tank 3 l. • Auxiliary motor for burner air cooling and mechanical two ways fuel pump. • Hose reel (optional).

Tekna

CHARACTERISTICS

- 4 poles electrical motor (1400 rpm) with thermal protection and water cooling. Three ceramic pistons, brass linear pump head with built-in by-pass valve.
- Low voltage and delayed Total Stop. Suction and delivery Stainless steel valves. Vertical burner with high thermal efficiency steel coil. High pressure detergent flow with 22 liters integrated detergent tank Auxiliary motor for burner air-cooling and two ways fuel pump. Temperature regulation gauge with high sensitive stainless steel sensor. Low fuel lamp and cut off. Safety valve. Header tank and antiscale device. Panel with analogic controls. Hose reel (optional).

HOT WATER

PLUS

Robust tubular frame in painted steel with central bar for lifting with crane or hoist, practical side hooks for accessories and protective top covers in stainless steel to preserve the motor pump from accidental shocks

Air chamber front wheels and two pivoting rear wheels for optimal stability and ease of movement on any type of surface

Widely oversized 4-pole industrial electric motor, protected from painting and equipped with elastic joint for better motor/pump coupling

Large 25-litre Diesel tank with level indicator and fuel shortage indicator light

STANDARD EQUIPMENT

• 00080-01695 Gun M22 - 3/8 with rotating coupling

• 10002-04732 Lance M22 high/ low pressure

- 00080-03247 nozzle 050 (mod. 2015)

HOT WATER

PLUS

All the models are equipped with a stainless steel outlet with rain protection

Automatic hose reel kit with 20 meters of hose (standard on the versions 36075-00045 / 36075-00043 / 36075-00047) and hose guide to facilitate the unwinding and rolling of the hose during work

On request, versions with a structure entirely made of stainless steel are available

Easily removable panels and upper canopy for faster maintenance

Other available versions:

- 36075-00046 HHPV 1212 without hose reel with 10m h.p hose
- 36075-00044 HHPV 2015 without hose reel with 10m h.p hose

HOT WATER WITH COMBUSTION ENGINE

PLUS

Sturdy painted steel frame with bar for lifting with crane or hoist, practical side hooks for accessories and protective stainless steel covers to preserve the motor pump from accidental impacts

Engine indicator panel with electric start, automatic regulation of the number of revolutions, boiler panel with burner activation switch and electronic temperature regulation

Yanmar L100V diesel engine, electric start panel with control lights, automatic rev decelerator

Flame control: stops hot water operation in the event of a burner malfunction, blocking the diesel solenoid valve and avoiding fouling of the unburned fuel boiler. It also prevents the flame from remaining lit even when the burner is already extinguished.

STANDARD EQUIPMENT

• 00080-01695 Gun M22 - 3/8 with rotating coupling	• 10002-04732 Lance M22 high/ low pressure	• 00080-03247 nozzle 050 (mod. 2016) • 00080-03341 nozzle 075 (mod. 1621)	00014-00514 High pressure hose 10 m - R2 5/16 (mod. 2016) 10002-04109 High pressure hose 10 m - R2 3/8 (mod. 1621)	• Flame control

• Turbo lance (on request) • Hose reel (on request) • Pipe cleaning hose (on request)

Vulcano 74

CHARACTERISTICS

Boiler feeding: Diesel High thermal efficiency vertical burner. • Shock-resistant self-bearing frame. • 4 big wheels for easy move. • Gasoil tank high capacity ensuring longer working. • Quick couplings supplied with the machine. • Diesel tank capacity 18 l. • High pressure hose 3/8" Ø 5/16" 10 m, to connect any cold high pressure cleaner to Vulcano (optional).

TECHNICAL DATA

	Vulcano 74
code	38003-00001
rated/max pressure	120/200 bar - 1740/2900 psi
max delivery flow rate	1260 l/h - 5.55 gpm
abs. power/supply	300 W/230V 1~50Hz
heat output	74 kW
T max water inlet/outlet	110/ °C
dimension (cm)/weight	94x65x90/44 Kg (88 lbs)

PLUS

Simple and intuitive control panel , with switch and temperature regulation thermostat

High-efficiency diesel vertical boiler with steel coil (stainless steel on request)

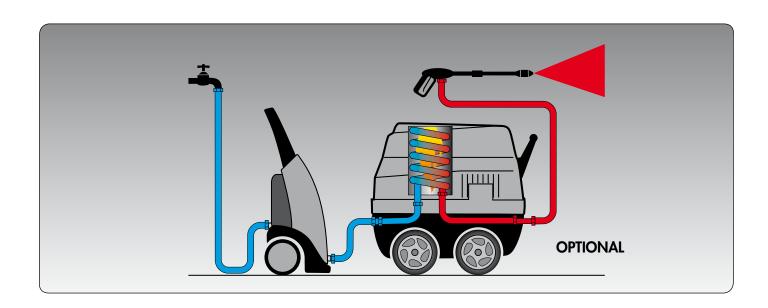

PROFESSIONAL LINE

Easily connected to all Lavor cold water high pressure cleaners for hot water generation

4 twinned solid wheels to facilitate movement on any type of surface

OPTIONAL

• 00080-02258 high presssure hose 3/8" ø 5/16" 10m, to connect any cold high pressure cleaner to the		
Vulcano.

00080-03448	rotary nozzle max 500 bar - 0.60
00080-03449	rotary nozzle max 500 bar - 0.65
00080-03450	rotary nozzle max 500 bar - 0.70
00080-03416	rotary nozzle max 350 bar - 0.40

Rotary head nozzle

Rotary nozzle max 350/500 bar:

G 1/4"F with Stainless steel body and seat/ nozzle in highly shock-resistant tungsten carbide

Extension set for rotary nozzle:

1/4"M - 1/4"M codes 00009-03342 + 00009-03220 Spare coupling for gun M 22

1) Sand-blasting heads max 250 bar, are not supplied with nozzles.

Orders will be always placed with the nozzle required.

Sand-blasting heads max 250 bar

00080-03451	Sand blasting head - blade type
00080-03452	Sand blasting head - round type
00080-03453	Sand blasting head - prolonged type

2) Prolonged adjustable probe for sand-blasting

00069-00364 Stainless steel prolonged adjustable Ø 21 probe L = 500 mm

Sand-blasting head

Sand-blasting nozzles

00080-03473	nozzle 0.40
00080-03472	nozzle 0.45
00080-03471	nozzle 0.50

Magnetic Antiscale Stainless steel 3/4 F - 3/4 M

Magnetic Antiscale Stainless steel

The magnetic antiscale is a method that reduces the negative effects caused by high water hardness through the action of a magnetic field, offering itself as a non-chemical alternative for water softening.

00069-00217 Magnetic antiscale 3/4 F - 3/4 M

Gun with extensible telescopic lance

Adapters are required to connect the gun to a 3/8" hose cod. 10001-10196 + 00009-03156

With coupling for quick coupling nozzle (without nozzle)

00080-01745 Curved lance set for gutters washing

Code	Description	Hole
00080-03425	Quick coupling ceramic nozzle 15°	035
00080-03426	Quick coupling ceramic nozzle 15°	04
00080-03427	Quick coupling ceramic nozzle 15°	045
00080-03428	Quick coupling ceramic nozzle 15°	05
00080-03429	Quick coupling ceramic nozzle 15°	055

High pressure inox lance

Code	Description
00080-03972	lance with nozzle holder 310 bar INOX 900 mm (without nozzle) M22-1/4"F
00080-03973	lance with nozzle holder 310 bar INOX 1200 mm (without nozzle) M22-1/4"F

Motorized head

- Stainless steel motorized head for case and tank cleaning
- Complete orbital internal coverage
- Complete with nozzles and converter

Motorized head	
code	00080-03443
operat. pressure	220 bar - 3190 psi
allowed pressure	250 bar - 3625 psi
operat. delivery rate	1260 l/h - 5,56 GPM
nominal temperature	90° C
min. diameter	Ø 40 mm
nozzle type	2 x M4

Floor Cleaning Lance

- Stainless steel floor cleaning lance (nozzle not included)
- Complete with RL 35 gun
- For washing terraces and external floors in general.

Floor Cleaning Lance 510	
code	00080-04580
operat. pressure	250 bar - 3625 psi
allowed pressure	280 bar - 4060 psi
operat. delivery rate	1800 l/h - 5,3 GPM
nominal temperature	82° C

for Thermic 13H and Thermic 17 HW in combination with M24 nipple cod. 00009-03218

Ø 510 mm

INOX

- Heavy duty polypropylene floor cleaning lance (nozzle not included)
 Complete with RL 35 gun
- For washing terraces and external floors in general.

Floor Cleaning Lance 460	
code	00080-05164
operat. pressure	250 bar - 3625 psi
allowed pressure	280 bar - 4060 psi
operat. delivery rate	2400 l/h - 7 GPM
nominal temperature	82° C

for Thermic 13H and Thermic 17 HW in combination with M24 nipple cod. 00009-03218

Lavor offers a comprehensive range of pumps and motor pumps constructed and designed to meet any requirement of the market, providing a long-lasting and reliable solution to address cleaning needs...

No compromises!

Lavor offering of pumps and motor pumps intentionally targets a clientèle seeking top quality and durability for this kind of products:

- 4-pole motors: They assure 1400 RPM speed, resulting in a decrease of pump and motor's operating temperatures, reduction in wear of consumables, lower oil deterioration inside the pump.
- Water cooled motors: Enhanced effectiveness and lower operating temperatures translate into compact sizes and high performance.
- Elastic coupling: it assures better alignment, dissipation of the heat from the motor rotor, lower stress on bearings, easy disassembly of the pump from the motor.
- Pump body in die cast aluminium: the casing design focuses on assuring stress is reduced to

the minimum and operating temperatures are reduced, with the aim of guaranteeing unlimited service life.

• Forged brass pump head: improved mechanical strength, superior resistance to corrosion and oxidation phenomena.

 Nickel plated forged brass (CW6) pump head: the perfect surface finish, jointly with the properties of the plating, assure

> improved resistance to chemicals and lower chance of deterioration caused by cavitation phenomena.

 Double gasket seal system the choice of the "U" gasket profile represents the maximum quality standard, assuring lower wear due to friction.

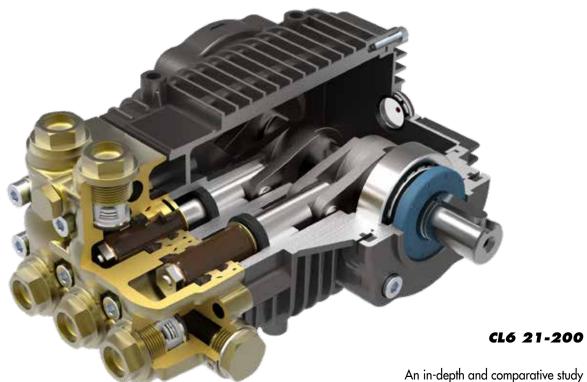

• High temperature seals (CW6): They assure optimal durability up to 85° operation.

- Valves with stainless steel plate and spherical seal: high fluid dynamics performance.
- Ceramic pistons (according to the models): to assure longer service life of the pistons and guarantee lower wear of water seals and improved resistance to thermal shocks.
- Double housing connecting rods (CL6-CW 6): ease of maintenance.
- "READY TO USE" pumps (CL3.5): This range provides built-in by-pass valve, low pressure detergent injector, total stop actuation micro-switch, pressure regulation and pressure gauge, making installation easier and speeding up replacement and maintenance operations.

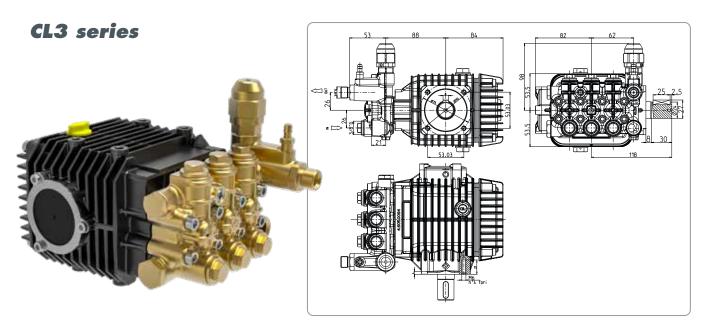

Pumps and electropumps

on each structural element • Low wear and tear ceramic pistons • Low friction connecting rod, built in aluminium alloy; double body for easy disassembly • Minimum charge on the cone-shaped bearings (through electronic calibration of the drive shaft rotation) • Very low operating temperature, favored by the use of water cooled motor • Top range up to 21 l/min.

PROFESSIONAL LINE

Power, air suction, depressure: which technical data is most important?

The right technical data of a vacuum cleaner is the vacuum efficiency, that is the mix of different values, i.e. air suction, motor power and depression. Air suction is the vacuumed air volume, commonly expressed in litres per seconds (I/sec) and it is the result of the average air speed multiplied by hose diameter. The depression is the vacuum power (it can be defined as the vacuum power to collect dirt) and it is commonly expressed in kPA or in mbar. It is an inverse relation to air suction: the narrower the flex diameter, the least vacuumed air volume but the best strength to pick up

dirt.

Power motor is expressed in Watt and it is not proportional to vacuum efficiency!

If the vacuum cleaner is not well-done, it wastes a lot of electric power without having the best performances possible. Summing up, the vacuum cleaner efficiency is a relationship between air suction (resulting in multiplication of pressure and air suction) and motor power. All our vacuum cleaners have a top efficiency and are manufactured considering essence and user's benefit.

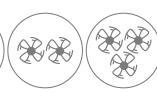

Fixed or tilting trolley, which one to choose?

The choice of the trolley must be made considering the type of use needed. Generally, tilting trolley is much more useful to collect dust and solids, because the tilting tank make it easier the emptying or pouring. The fixed trolley is better for liquids vacuuming, because it is equipped with drain hose system, emptying is fast and step by step, avoiding the effort of lifting the tank.

What kind of tank material is to be preferred?

Our vacuum cleaner range includes plastic tanks (polypropylene or PP) or stainless steel tanks. The PP tank is flexible, shock proof and resistant to chemical products. It is recommended for frequent moving uses or vacuuming of particularly aggressive chemicals (for example in combination with a single disc machine). The stainless steel tank is more rigid, steadier, resistant to mechanical abrasion and it is aesthetically agreeable. It is recommended for static use, with abrasive materials or in a public place.

Number of motors

It explains how many motors there are in the vacuum cleaner. Ignition is independent in order to increase progressively the performances. The working system (whenever it is more than one) is in parallel, so the air suction increases and the depressure is steady whenever the motors are progressively switched on.

• Anti electrostatic current device

Dust rubbing at high speed against vacuum cleaner walls creates a magnetic field that neutralizes on the user with small and annoying discharges also through plastic material. This certified system removes this phenomenon on the machine, granting best comfort and safety for the user.

• Paper collector filter

Allows filtering and collection (with a valve) of rough dirt without dirty the tank whenever it is time to replace it. It is useful for dry waste, also in combination of other thinner filters.

• Cloth filter

The cloth consistency and its shape allow a simple cleaning phase and the re-usage of the filter. It can be used only for vacuuming dry waste; if combined with nylon filter it is possible to work for a longer period of time.

Cartridge filter

The continuous folders arranged in circle allow a higher filtering surface in a smaller area. More cleaning autonomy with a thin filtering action. It can be used only for vacuuming dry waste and it is re-usable.

• Multipurpose washable filter

It combines all the advantages of the cartridge filter but with the plus that it can vacuum both dry and wet at the same time. It can be washed with tap water.

• HEPA filter

High Efficiency Particulate Arrestance. Hepa filter is 99,97% efficient until 0,3 micron impurities.

• Filter shaker

It clears filter from dust without touching it or opening the vacuum cleaner; the vacuum efficiency is kept at max.

Blower function

In blower mode, a high-velocity stream of air is used to blow away debris from surfaces.

Power tool socket

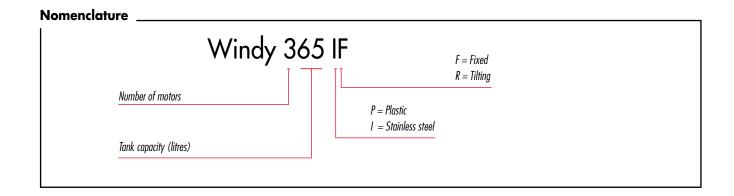

The vacuum cleaner switches on and off by power tool switching on and off. In this way it is possible to vacuum dust directly without dispersion in the surrounding area.

• M Class certificate for vacuum cleaner

It is the ability of the vacuum cleaner to keep (though the filtering system and the manufacturing specifications of the vacuum cleaner) the 99,9% of all vacuumed dust with OEL (Occupational Exposure Limit) higher than a 0,1 mg/m3. Some example of the dusts that can be kept with these vacuum cleaners are working residuals of: wood, copper, insecticide and pesticide, manganese (tools of the earth-moving equipments), platinum, nickel etc.

DRY

Silent

CHARACTERISTICS

Professional ultra silent vacuum cleaners, Lavor Silent was conceived to meet the needs of floor care sector. • Silenced single stage motor (high efficiency). • Integrated accessory holder. • Shock and overturn proof design. • 12 litre plastic tank (PP) • Cloth filter • Rotating ON/OFF switch • Paper collector filter. • 10 m high visibility power cable. • Accessories Ø 32

TECHNICAL DATA

	Silent
code	40025-00019
voltage	220-240V ~ 50-60Hz
n°motors - power	1 - 800 W
column depression	24 kPa/2400 mmH ₂ O
air suction	44 /s
total volume	12 l.
dimension (cm)/weight	39x39x42/6,8 kg

PLUS

Rotating ON/OFF and comfortable carrying handle

Power cable holder and accessory storage facility (accessories d. 32

12 litre plastic tank (PP) and swivel connection to avoid tangles in the flex hose

Shock and overturn proof design

STANDARD EQUIPMENT

OPTIONAL

• 10001-13222 Paper collector filter set (10 pcs)	• Hepa filter on request

OPTIONAL

• 10001-09446 - Ø 40 chromium | • 10001-09441 - Ø 40 complete plated steel curve and extension pipe kit

accessories kit (holder accessories, floor brush, wet tool, carpet tool)

• 10001-08208 Cloth filter for fine dust.

Injection extraction range

Lavor professional extraction/injection machines: **Hydrus**, **Jupiter**, **Apollo**, **Solaris**, **Costellation** are the real solution to clean any type of textiles!

Machines equipped with 6,5 up to 78 liters tanks, 1 or 2 double stage motors, 1 or 2 detergent pumps to assure always the right flow of injected chemical.

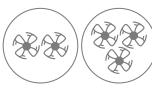

Provided with a full range of accessories capable to suit each deep cleaning textile application: carpets, vehicle seats, sofas, tents, chairs, mats, etc... To be used in the **HO-RE-CA**, **Automotive** and **Industrial** cleaning, they will perfectly fit any requirements.

A range of injection/extraction cleaning machines ideal for car cleaning, as they can be used with thick foam or liquid detergent.

Equipped with a connection for compressed air with pressure regulator and an external tank of 12 liters capacity, which allows detergent refilling without opening the machine.

Number of motors

It explains how many motors there are in the vacuum cleaner. Ignition is independent in order to increase progressively the performances. The working system (whenever it is more than one) is in parallel, so the air suction increases and the depressure is steady whenever the motors are progressively switched on.

• Cloth filter

The cloth consistency and its shape allow a simple cleaning phase and the re-usage of the filter. It can be used only for vacuuming dry waste; if combined with nylon filter it is possible to work for a longer period of time.

Paper collector filter

Allows filtering and collection (with a valve) of rough dirt without dirty the tank whenever it is time to replace it. It is useful for dry waste, also in combination of other thinner filters.

Multipurpose washable filter

It combines all the advantages of the cartridge filter but with the plus that it can vacuum both dry and wet at the same time. It can be washed with tap water.

Antistatic machines and accessories

Using specific conductive materials and engineering, there's the prevention of ignition sparks from the machine side, up to the end of any tool available for this machine range.

• Unlimited autonomy

The boiler is refilled by a water pump that gets water from an external water tank. This system allows an unlimited autonomy, because it is not necessary to turn off the steam generator and wait a lower temperature to refill with water. An automatic control recharges the boiler when necessary. In some models there is an acoustic signal advising about low water level inside the water tank.

LAVOR

Hydrus

CHARACTERISTICS

• Silenced single stage motor. • Suction system with by-pass cooling. • 20 lt. plastic tank (PP) • 2 lt. Solution tank • Shock proof trolley. • Liquid float valve. • 7,5 m power cable. • Washable filter • Paper collector filter • Detergent pump 48W - 0,7 l/min - 7 bar max • Accessories Ø 35.

• No stop refilling, unlimited autonomy

WET & DRY

 \varnothing 40 Spacer for plastic bag 58 l. (for Domus/Taurus/Solaris/Costellation models) This accessory is necessary when using collector bag: the use of collector bag is not possible without PVC spacer.

The use of the collector bag grants easy filter cleaning and its quick replacement whenever necessary, saving time also during the operation of tank cleaning.

Ø 40 Gangway tool (only for Domus PR/Domus IR/Taurus PR/ Taurus IR/Costellation IR models)

A set made of special accessory with front and back squeegee + a flex connection hose in order to vacuum easily and quickly water and liquid from the floor.

00085-02558 front squeegee strip with hole 00085-02559 rear squeegee strip without hole

Code 00080-03076

Turbo brush Ø 35

Code 00080-01955

Antifoam device

Code 00080-03080

This device avoids the forming of foam that may affect the operation of the float. (For Zeus, Domus, Taurus, Apollo, Solaris, Costellation models)

Why wider filtering area is not making automatically a better machine?

In the industrial sector, productivity, resistance and breakeven expectations are growing. The ideal vacuum would be then a machine filtering any kind of dust (also the thinnest) being able to work continuously without the need to clean the filter and without any maintenance.

It is more important to get close effectively to this target rather than the way we can reach this. This is the reason why is useless having a big filtering area if the filter is still clogging up fast and more often I need to stop working to clean it.

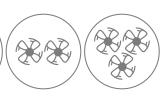

In our machines we developed the best prevention of the problem (avoiding dust is reaching quickly the filter) rather than trying a solution afterwards (since the filter is clogging up quickly, extending the filtering area it is supposed to extend the effectiveness). It doesn't matter how wide is the filter, but for how long can work the machine without the need to clean the filter...

And with this issue, we are the best.

When either more airflow or more depressure is necessary?

The airflow helps the dirt transport trough long pipes. Longer is the hose, better is bigger airflow; still with light dust it is better having lower depressure: the inlet air speed will be lower, the harder the dirt is getting in touch with the filter. When residuals have high specific weight, depressure is more important than airflow to win gravity force of dirt attached to the surface.

Number of motors

It explains how many motors there are in the vacuum cleaner. Ignition is independent in order to increase progressively the performances. The working system (whenever it is more than one) is in parallel, so the air suction increases and the depressure is steady whenever the motors are progressively switched on.

Cloth filter

The cloth consistency and its shape allow a simple cleaning phase and the re-usage of the filter. It can be used only for vacuuming dry waste; if combined with nylon filter it is possible to work for a longer period of time.

Cartridge filter

The continuous folders arranged in circle allow a higher filtering surface in a smaller area. More cleaning autonomy with a thin filtering action. It can be used only for vacuuming dry waste and it is re-usable.

• Multipurpose washable filter

It combines all the advantages of the cartridge filter but with the plus that it can vacuum both dry and wet at the same time. It can be washed with tap water.

• **Pocket filter:** has a large filtering surface, guarantees high air filtration efficiency and a notable dust accumulation capacity

Integrated submersible pump in the tank

the draining is continuous and without stopping working.

With this accessory it is possible to push out completely also melting residual up to 20 mm.

Automatic self cleaning filter system (international copyright)

continuous vacuum performance without maintenance filters are automatically cleaned by mechanical vibration. It is not necessary to touch the filter or clean it outside the vacuum cleaner spreading again dust everywhere.

Manual filter shaker

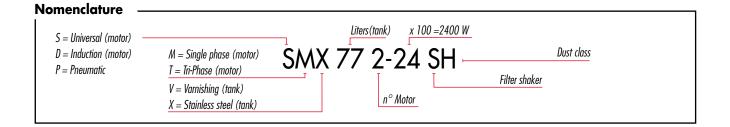

Mechanical horizontal and simple manual filter cleaning system

Antistatic machine and accessories

Using specific conductive materials and engineering, there's the prevention of ignition sparks from the machine side, up to the end of any tool available for this machine range.

code	40033-00003
abs. power W	3000
n°/type motor	3 x two stages universal
max vacuum (actual)	24 kPa (2400 mmH2O)
max Airflow	162 l/s
container capacity	80
noise level	76 dB(A)
voltage	220-240 V~50-60 Hz (1Ph)
inlet Ø - type (s=straight; t=tangential)	70 mm - s
filtering capacity/surface	5 μm/ 4460 cm ²
cable lenght	7,5 m
dimension (cm)/weight	68x58x130/45Kg

PLUS

3 double stage silenced motors, suction system with by-pass cooling, liquid float valve and antistatic device

80 litres stainless steel tank

Cloth filter and manual filter shaker that keeps the filter clean thanks to a simple manual swing mechanism

Power coated steel structure with front pivoting non-marking wheels with brakes and large inbuilt storage compartment

STANDARD EQUIPMENT

• 00070-00679 - Cloth filter

• 00014-02300 Quick release adaptor Ø70-50 (1x)

There isn't any hose or tool provided within the unit.

OPTIONAL

• 10001-09534 KIT 1 for industrial cleaning, included:

• 00014-02293 2 x Accessories sleeve eva Ø 50 • 00080-01831 4 x Eva conductive flexible hose Ø 50 (mt 4) • 00026-01129 Steel handle Ø50 • 00080-04097 Dust inox tool • 00080-01589 PVC flat lance with galvanized joint Ø50 • 00080-01590 PVC round brush with galvanized joint Ø50

• 10001-09535 KIT 2 for oil and swarf cleaning, included:

• 00014-02292 2 x Accessories sleeve PUR/PVC Ø 50 • 00080-01833 4 x Pur antistatic flexible hose Ø 50 (mt 4) • 00040-01251 Galvanized chip basket • 00080-01587 Rubber antistatic round lance Ø50

Optional minimum set to run the unit:		
• 10001-09372 3m complete EVA Ø50 hose set (1x) + 00080-01589 adapter		

SMV100 3-36 SAH

CHARACTERISTICS

• 3 silenced two stage by-pass cooling motors • Power coated steel structure and containers • Self-cleaning filter system for continuous operations • 3 HEPA + PTFE cartridge conductive filters • Metal side inlet channel and AISI 304 stainless steel filter protection • Wheeled container with inbuilt quick release handle, drain plug and full load level • Trolley with front pivoting non-marking wheels (with breake) & large inbuilt accessories basket • Removable motors unit header through metal hooks

	SMV100 3-36 SAH
code	40039-00007
abs. power W	3300
n°/type motor	3 x two stages universal
max vacuum (actual)	24 kPa (2400 mmH ₂ O)
max Airflow	510 m ³ /h - 142 l/s
container capacity	100
noise level	78 dB(A)
voltage	230 V~50 Hz (1Ph)
inlet Ø - type (s=straight; t=tangential)	60 mm - t
filtering capacity/surface	1 μm - 99,995% (H Class)/ 9000 cm ²
cable lenght	10 m
dimension (cm)/weight	60x80x147/59 kg

PLUS

3 double stage silenced motors, suction system with by-pass cooling, liquid float valve and antistatic device

Automatic self-cleaning filter shaker (international copyright): it activates automatically without stopping the vacuum phase

3 cartridge filters in the upper part and ULPA filter in the lower part to offer a structured and complete filtering

Sturdy structure in stove-painted steel with non-marking pivoting front wheels with brake and large inbuilt storage compartment

RECOMMENDED FOR: vacuuming great quantities of dust, it is ideal in road or construction sites. It can feature the LONGOPACK set as optional (code 25001-00640 together with 10001-07796 and 10001-07797) that allows easier emptying of the collected dust.

STANDARD EQUIPMENT

• 00070-00394 HEPA (H14) + PTFE cartridge filter (3x)	• 00009-03441 Quick release adaptor Ø60-50 (1x)			
--	--	--	--	--

There isn't any hose or tool provided within the unit.

OPTIONAL

Optional minimum set to run the unit:

• 10001-09372 3m complete EVA Ø50 hose set (1x)

Longpack set:

• 10001-07796 Hopper for spool bag collection • 10001-07797 Tray for spool bag collection • 25001-00640 Longopack 22m bag spools (box of 4)

• 00070-00395 ULPA (H13) D.O.P. cartridge filter

DMX-R 80/DTX-R 80

CHARACTERISTICS

• IP 55 silenced turbine motor • Stainless steel container • Mechanical horizontal & simple manual filter cleaning system • Steel closing hooks • Static electric shock inhibitor • Power coated steel structure and containers • Steering wheels with brake. • Liquid float valve • Pressure relief valve, safety device avoiding engine problems in case of clogging • Drain hose system • Quick release tank system

PLUS

IP 55 silenced turbine motor and pressure relief valve

Filter shaker that keeps the filter clean thanks to a simple manual swing mechanism

Drain hose system for tank easy emptying

Accessories diameter 40 mm

RECOMMENDED FOR: car wash sector

STANDARD EQUIPMENT

• Flexible hose ø 40 - 3 m code 00080-04012

code 00070-00679

DTV100 1-30 SL

CHARACTERISTICS

• 1 single stage side channel blower with three-phase induction motor • Power coated steel structure and containers • Mechanical horizontal & simple manual filter cleaning system • Polyester non woven fabric pockets filter, class L • Metal central inlet channel with deflector • Wheeled container with inbuilt quick release handle, drain plug and full load level • Trolley with front pivoting non-marking wheels (with breake) & large inbuilt accessories basket • Removable motor unit header through metal hooks

	DTV100 1-30 SL
code	40040-00052
abs. power W	3000
n°/type motor	1/induction
max vacuum (actual)	32 kPa (2600 mmH ₂ O)
max Airflow	320 m³/h - 89 l/s
container capacity	100
noise level	78 dB(A)
voltage	400 V~50 Hz (3Ph)
inlet Ø - type (s=straight; t=tangential)	70 mm - s
filtering capacity/surface	2 μm - 99% (L Class)/20000 cm ²
cable lenght	10 m
dimension (cm)/weight	80x60x171/83 kg - 182 lbs

PLUS

1 single stage side channel blower with three-phase induction motor

Polyester non woven fabric pocket filter, class L for increased filtering capacity

Filter shaker that keeps the filter clean thanks to a simple manual swing mechanism

Sturdy steel structure with nonmarking pivoting front wheels with brake and large inbuilt storage compartment

RECOMMENDED FOR: use in industry sector: it is a very versatile product, thanks to the many optional packs available, it can adapt to the most varied needs. In case of wet suction it is possible to have the float (code 00069-00379 + 00040-01266) and the emptying tap (code 10001-07798) as options.

STANDARD EQUIPMENT

• 00070-00396 Polyester pockets filter 2m², class L			
--	--	--	--

There isn't any hose or tool provided within the unit.

Optional minimum set to run the unit: • 10001-09372 3m complete EVA Ø50 hose set (1x)		Longpack set: spool bag collection • 10001-07797 11-00640 Longopack 22m bag spools (b		• 00070-00397 Polyester pockets filter 3m², class L

• 00069-00379 Floater for wet suction	00042-03611 Wet filter protection cone for floater stop	• 10001-07798 Container discharge faucet kit	00040-01331 Galvanized chip basket including floater	00042-03611 Wet filter protection cone for floater stop

DTV100 1-30 OIL

Nylon

CHARACTERISTICS

- 1 single stage side channel blower with three-phase induction motor Power coated steel structure and containers. Stainless steel AISI 304 submersible electric pump (S1) for liquid (and up to 20mm size mixed waste) automatic discharge. Washable nylon filter Metal central inlet channel with deflector
- Wheeled container with inbuilt quick release handle, drain plug and full load level Trolley with front pivoting non-marking wheels (with breake) & large inbuilt accessories basket Removable motor unit header through metal hooks

	DTV100 1-30 OIL
code	40040-00053
abs. power W	3000
n°/type motor	1/induction
max vacuum (actual)	32 kPa (2600 mmH ₂ O)
max Airflow	320 m³/h - 89 l/s
container capacity	100
noise level	78 dB(A)
voltage	400V~ 50 Hz (3Ph)
inlet Ø - type (s=straight; t=tangential)	70 mm - s
filtering capacity/surface	3,2 μm/7000 cm ²
cable lenght	10 m
dimension (cm)/weight	80x60x171 / 83 kg - 182 lbs

PLUS

1 single stage side channel blower with three-phase induction motor

Washable nylon filter; metal central inlet channel with deflector, ideal for wet suction

Brass submersible electric pump 550 Watt (S1) for liquid (and up to 20 mm size mixed waste) automatic discharge

Sturdy steel structure with nonmarking pivoting front wheels with brake and large inbuilt storage compartment

RECOMMENDED FOR: wet suction, ideal for transferring liquids or oil

STANDARD EQUIPMENT

• 00070-00402 Washable nylon filter 0,7 m²	• 00014-02300 Adaptor Ø 70-50 (1x)		

There isn't any hose or tool provided within the unit.

Optional minimum set to run the unit: • 10001-09374 3 m complete PUR Ø 50 hose set (1x) + 00080-01594 Liquid discharge hose & gun Ø 25 mm x 1,8 m	• 00070-00400 180°C Heatproof polyester pockets filter 2 m², class M	00054-00569 Wheeled 100l container with inbuilt quick release handle, drain plug and full load level	• 00070-00397 Polyester pockets filter 3m², class L
• 10001-07793 Short galvanized chip basket			

DTV100 1-55 SL

CHARACTERISTICS

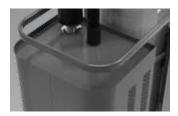

• 1 (parallel) double stage side channel blower with three-phase induction motor • Power coated steel structure and containers • Mechanical horizontal & simple manual filter cleaning system • Polyester non woven fabric pockets filter, class L • Metal central inlet channel with deflector • Wheeled container with inbuilt quick release handle, drain plug and full load level • Trolley with rear pivoting non-marking wheels (with breake) & large inbuilt accessories tray

• Removable top cover header through metal hooks

	DTV100 1-55 SL
code	40040-00055
abs. power W	5500
n°/type motor	1/induction
max vacuum (actual)	32 kPa (2600 mmH ₂ O)
max Airflow	560 m³/h - 156 l/s
container capacity	100
noise level	78 dB(A)
voltage	400 V~50 Hz (3Ph)
inlet Ø - type (s=straight; t=tangential)	70mm - s
filtering capacity/surface	2 μm - 99,9% (L Class)/ 20000 cm ²
cable lenght	10 m
dimension (cm)/weight	100x60x140 / 143 kg - 315 lbs

INDUSTRIAL

PLUS

1 parallel double stage side channel blower with three-phase induction motor

Polyester non woven fabric pocket filter, class L for increased filtering capacity

Filter shaker that keeps the filter clean thanks to a simple manual swing mechanism

Sturdy steel structure with nonmarking pivoting front wheels with brake and large inbuilt storage compartment

RECOMMENDED FOR: use in industry sector: it is a very versatile product, thanks to the many optional packs available, it can adapt to the most varied needs. It has great airflow and great pressure and can therefore also be used with longer hoses or by two or more operators

STANDARD EQUIPMENT

• 00070-00396 Polyester pockets filter 2m², class L			
--	--	--	--

There isn't any hose or tool provided within the unit.

OPTIONAL

Optional minimum set to run the unit: • 10001-09372 3m complete EVA Ø50 hose set (1x)		Tray for spool bag collection ox of 4)	• 00070-00397 Polyester pockets filter 3m², class L

Which are key components in a single disc machine?

The procedure to choose the right product for specific application must take into consideration of: the weight (that is the pressure over the brush), the surface to work, the RPM / type of construction of the motor and the transmission type. Generally speaking, the lower is the rotation speed, the most effective is the pressure over the brush and deeper is dirt removal. With the increasing of rotation speed, lower is the effect of the pressure over the floor. Different accessories combinations, rotation speed and motor power can provide the solution for any application: from dewaxing or deep scrub, up to polishing or buffing; from the crystallization up to spray cleaning; also

carpet cleaning or sanding. Please see application chapter on the next pages. How much power is necessary?

There is not a set rule, if not the common sense: higher is the friction over the floor (a combination of type of working, type of surface and type of accessory used), the higher will be the power request to the motor. So more powerful is the motor, the harder the job being able to be done.

The power is nothing without control....

Together with its construction simplicity there are the worst danger for the operator who has to control the machine for long working sessions.

Only the perfect components and weights distribution on the machine allows a perfect balanced and ergonomic working posture, without any vibration and any strange effort to keep it in place.

A cheap construction (less strength) not considering the perfect ergonomic for the user, further to the waste of money (less productivity), it's a serious danger for the health!

Brush speed

Means Rotation Per Minute of the brush.

Constant brush pressure

The pressure of brushes on the floor is made by the heavy brush plate that follows irregularity on the floor and gives always the top pressure without any adjustment still with shorter bristles.

Applications pads

MICROFIBER PAD - Ideal for "gres & porcelain" and carpet/moquette if used with dried foam shampoo.

BEIGE PAD - POLISHING - Polyester To polish all kinds of floor. Use dry.

GREEN PAD - INTERMEDIATE CLEANING ACTION - Nylon To remove all the old superficial wax, rests, obtaining ready floors to be recoated. Use wet.

BLACK PAD - WET STRIPPING - Nylon For wet stripping of heavy layers of wax. Ideal to remove old floor finish scu and cement marks.

SDM-R 45 G

CHARACTERISTICS

• Complete range of single disc machines professional, sturdy, manageable, practical and simple to use. • Ergonomic handle with integrated safety controls. • Strong handle joint. • Powerful and noiseless motor. • Adapted in order to satisfy all the cleaning requirements, marble restoration and treatment and natural stones, woods and parquet, maguette, dewaxing, hard scrubbing.

SDM-R 53 G

CHARACTERISTICS

• Professional ultra-highspeed and high efficiency single disc machine ideal for polishing whichever type of natural or treated with metalized waxes floors (brush not included). • Ergonomic handle with integrated controls and sturdy joint. • Powerful and quiet motor. • Vacuum system. Inlauding a paper collector bag (5 pcs set optional, code 00070-00422). • Flexible disc holder counterbalancing eventual unevenness

X = suitable

Why cilindric brush?

materials.

High speed rotation for a polishing effect; great dirt degrease in floors with grout; possibility to link together the sweeping function; the rotation direction assists forwarding in models without traction.

Why disc brush?

Extended mechanical action of the bristles on the floor, ideal for persistent dirt: the special setting of the brush plate allows a balanced gripping effect, assisting easy use in the non traction models. Complete cleaning also next to walls is possible and the compact washing element lower at the sides is studied to scrub also under edges.

How a squeegee should be designed?

The shape and the material used grant a perfect drying in every condition, also on floors with grout or when quick U turns are necessary.

The floating body can stay in the machine operating space (compact/room saving)

The manual adjusting system grants a perfect drying on each kind of floors.

How long do battery charges last?

It is impossible to determine exactly how long a battery charge lasts and so how long a machine can work in autonomy.

Battery autonomy changes depending on type of surface, dirt quantity, brush type and way in which traction system is used (speed and slope).

Battery life is made up of number of charge cycles (also incomplete), if usage conditions, charging and service are perfectly observed.

Manufacturing technology diversifies numbers of cycles, service needed, usage/charging conditions and performances.

• Number of disc brushes

The scrubbing group meets different cleaning path need with 1, 2 or 3 disc brushes.

Number of cilindric brushes

Scrubbing group offer 1 or 2 roller brush solutions together with the sweeping capability. Bristles of different material allows perfect cleaning in any conditions, (carpet and parquet included).

• Cilindric brush quick connection and release:

The fittings and releasing of brushes is toolless. Ordinary cleaning maintenace are simple and quick for anybody.

Solenoid valve

Together with the reliable mechanical solution faucet, this system reduce chemical consumption and avoid solution waste. The flow is open only when brush is working, there is no accidental leak with machine stopped. The system is protected by a filter with easy maintenance.

• Integrated battery charger

Some models are equipped with integrated battery charger, other ones have the predisposition only. It is possible to charge batteries in different rooms, without coming back to the same place.

Integrated battery

Standard integrated battery is built with a maintenance free technology and it does not require restrictions about the place for battery charging. The non stop research allow to use always up-to-date batteries that combined with appropriate battery charger grant machine top performances.

• Hour meter

This device allows you to control work sessions (of the machine and the operator) and correctly plan stops to recharge the batteries or maintain the machines. Maximum productivity and investment protection.

• Lithium batteries as standard

They provide more power, longer life and much faster charging times.

They are not affected by the memory effect and are lighter in weight with lower maintenance costs.

Charge meter and battery protection

It informs when the autonomy is finishing, allowing the end of the cleaning task (stopping brushes first and then the rest). It prevents damages to the batteries, preventing the complete discharge with any kind of technologies.

• Eco Energy System

no-stop and separate control of water quantity and chemical product concentration with automatic and delayed stop of the supply when the machine stops (Automatic Detergent Measuring System).

Applications pads

BEIGE PAD - POLISHING Polyester To polish all kinds of floor. Use dry.

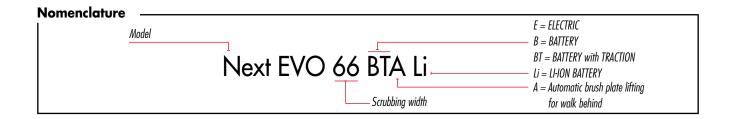

GREEN PAD - INTERMEDIATE
CLEANING ACTION - Nylon To remove
all the old superficial wax, rests, obtaining
ready floors to be recoated. Use wet.

BLACK PAD - WET STRIPPING- Nylon For wet stripping of heavy layers of wax. Ideal to remove old floor finish scu and cement marks.

Sprinter

CHARACTERISTICS

Suitable to work in high congested areas like small shops, offices, kitchens, schools, hospitals, bars, gyms, restaurants
Three controls for brush drive, washing and drying operations
Double floor squeegee for both forward and reverse drying
Sound pressure 68 dB (A)
Min. working height required 200 mm
Structure built with durable materials
Suitable load on the brush for an optimal cleaning

efficiency • Detachable detergent/recovery tank • Cable holder • 7mt electric cable • Non-marking wheels.

	Sprinter
code	37021-00002
power supply	230 V - 50 Hz
scrubbing/squeegee width	290/320 mm
max working capacity	1015 m ² /h
solution tank capacity	2.8 l/0.74 gal
recovery tank capacity	5.6 l/1.48 gal
traction	mechanical
RPM/pressure on the brush	1000/7 kg/15,43 lbs
brush motor power	200 W
noise level dB (A)	68
depression/vacuum motor	1428 mmH ₂ O/800 W
dimension (cm)/weight	37 x 37 x 113/13 kg

PLUS

- 1) Brush motor
- 2) Vacuum motor
- 3) Detergent solution flow
- 4) Dirty liquid flow

Double squeegee for both forward and reverse washing and drying. PP brush suitable for most common floors (brush for carpet and moquette cleaning available cod. 10001-09817). ABS shock-proof covers. Non-marking rubber wheels.

Minimun working height 200 mm, allowing perfect cleaning under furnitures, chairs, tables, beds, etc. The tilting handle makes easy and stressless the daily use of the machine. Large tank capacity avoiding frequent refilling of the unit

Cylindrical brush quick connection and release: the fitting and releasing of the brush does not require the use of tools. Ordinary cleaning and maintenance are simple and quick for anybody

STANDARD EQUIPMENT

Stationary plate

OPTIONAL

Crystal clean

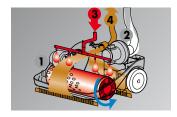

CHARACTERISTICS

• Suitable to work in high congested areas like small shops, offices, kitchens, schools, hospitals, bars, gyms, restaurants • Max 90°C hot scrubbing • Three controls for brush drive, washing and drying operations • Double floor squeegee for both forward and reverse drying • Sound pressure 68 dB (A) • Min. working height required 200 mm • Structure built with durable materials • Suitable load on the brush for an optimal cleaning efficiency • Detachable detergent/recovery tank • Cable holder • 10 mt electric cable • Non-marking wheels.

PLUS

Mini floor-scrubber dryer for daily cleaning, designed for the Ho.re. ca sector and cleaning companies. Washes and dries quickly saving time and effort. Lithium-ion technology: always ready to use, fast charge, maximum power.

Agile, compact and versatile: easy cleaning in the tightest areas, suitable for the cleaning of all types of "hard" floors. Ergonomic handle. Height-adjustable handle. Professional brushes to clean the most stubborn dirt.

Joint that allows to maneuver the mini floor scrubber dryer with extreme simplicity. LED headlamp. Removable detergent solution tank. Removable dirt water tank easy to

Pratical on/off foot switch. Drying: the squeegee ensures the floor instant drying.

STANDARD EQUIPMENT

• 00080-04154 PP Brush

• 00005-02201 Front squeegee blade • 00005-02202 Rear squeegee blade

• 00056-00081 Battery charger UE plug

OPTIONAL

• 00056-00082 - UK plug market battery charger

• 00056-00083 - USA plug market

battery charger

Ready

CHARACTERISTICS

• Ready: washes, sweeps and dries in both working directions. • High cleaning performance thanks to the dual contra-rotating cylindrical brushes. • Key features: sweeping action, bi-directional drying, multi-surface capabilities (including carpets and rugs). • "Start-stop" safety handle. • Lightweight (only 15Kg) and easy to handle, cleaning the floor has never been less tiring. • Maintenance and lubrication free • Low running noise <70 dB

	Ready 32B Li
code	47001-00001
power supply	36V (battery and charger included)
scrubbing/squeegee width	320/340 mm
max working capacity	1500 m²/h
solution tank capacity	3,5 l/0.92 gal
recovery tank capacity	6,0 l/1.59 gal
traction	mechanical
RPM/pressure on the brush	650/17 kg/37.50 lbs
brush motor power	200 W
noise level dB (A)	<70
depression/vacuum motor	1000 mmH ₂ O/100 W
dimension(cm)/weight	49x41x112/15 Kg

PLUS

Dual contra-rotating cylindrical brushes offer up to 40% more cleaning performance in a single pass, significantly increasing productivity. The machine features a safety handle for switching it on and off instantaneously.

Sweeping function thanks to the dual contra-rotating cylindrical brushes, combined with a special "mechanical" recovery system, Ready washes, sweeps and dries at the same time.

it is suited for wood, cotto, ceramic floor tiles, stone, marble, textured flooring, bolted rubber flooring, carpet tiles and carpets with ease.

The perfect balance: the centrally mounted motor and tank ensure a perfect balance, the essential prerequisite for light weight and good handling in all conditions. Completely protected components: the only fully sealed machine: no water, dust or residue of any kind can get into it.

STANDARD EQUIPMENT

• 2 x 00080-04085 Grey Brush (universal, all-purpose for all types of flooring)

• 10001-07783 Kit squeegee dual - assembled

• 10001-07784 Kit squeegee mono – not assembled

• 00055-00100 LI-ION battery

• 00056-00010 Battery Charger (V 110/115/240 50/60 Hz)

OPTIONAL

• 2 x 00080-04086 Black Brush (hard, all-purpose for hard floor, moquettes)

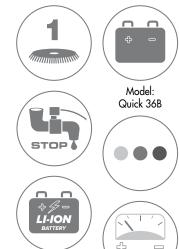

• 00056-00011 Fast charger

PLUS

Powerful gearmotor; metal brush plate with integrated plastic splash guard/bumper.

The outflow of the detergent solution is controlled by a solenoid valve. The actuation of the solenoid valve is operated by the control lever, avoiding the detergent solution outflow when the brush is stopped during the interruptions of work.

Renovated squeegee with new pressure adjusting system. Quick and easy squeegee coupling through the two large knobs; the squeegee is released without any damage in the event of accidental impact.

Easy and intuitive controls. The outflow of the cleaning solution is easily controlled using the mechanical lever placed on the control panel. Inspectable mesh filter to trap any existing solid body in the cleaning solution.

WALK BEHIND

PLUS

Easy access to battery and vacuum motor compartment, without using tools. Large capacity shock and acid proof polyethilene tanks (88 I) avoid frequent refilling and idle time. 4 x 6V -180 Ah C5 batteries granting continuous working time up to 4-5 hours.

Adjustable speed ensures high precision in cleaning congested areas with obstacles. Intuitive controls reduce operator's training time. Safety thermal breakers prevent motor problems in case of overheating or operator's misuse.

Heavy duty V-shaped squeegee ensures perfect drying of every type of floor, even with large joints. Nonmarking wheels avoid marks after the drying. Completely adjustable to fit any surface.

Strong mechanical control levers for heavy duty use. Large size drain hose for a fast emptying and a better cleaning of the recovery tank. Quick fitting battery charger

Comfort XXS

Model: 37010-00053

Model: 37010-00053 37010-00060

CHARACTERISTICS

Designed for the maintenance and deep cleaning of large areas (up to 3200 m².) with a very important reduction of cleaning cost. Very compact size and great maneuverability like walk behind models: suited for maintenance cleaning. • 32 kg. of constant pressure on the brushes. • Double counter rotating brush (66 cm of scrubbing width) obtaining better stability and constant pressure. • Great working autonomy thanks to the possibility to use 4 batteries 6 V 240 Ah and to rear wheel-drive. • Large load tank capacity (real load of 85 l.), resulting in reduced numbers of stops and maximum use of battery for effective operation of the machine. • Ergonomic steering wheel of new design with user friendly controls and digital display. • Easy access to electrical components. • Inspection cover for fast and easy cleaning and sanification of dirt water tank. • Automatic device that stops brushes and detergent water outflow when the machine is stationary. • Self-levelling brush plate. • Automatic detergent dosing system.

PLUS

Great working autonomy thanks to the possibility to use 4 batteries 6 V 180 Ah granting continuous working up. Possibility to use also 2 batteries 12V. Less battery consumption thanks to rear wheeldrive. Large load tanks made of shock and acid proof polyethylene (real load of 85 l.), avoiding frequent stop for refilling.

User friendly control panel. Steering wheel with digital controls and display. Squeegee and brush plate mechanical and user friendly lifting lever: min. maintenance cost training time for the users. Scrubbing unit with double brush with brush plate made of steel for a great pressure (32 Kg.) on the floor resulting in an easy and deep cleaning of any kind of dirt.

Detergent solution is cleansed by an external completely accessible filter, that holds any impurities, thus protecting the solenoid valve. The easy access to all internal components of XXS make it possible to reduce maintenance cost. Detergent tank 2lt.

The comfortable and ergonomic seat allows the operator to work effortless for a long time, improving productivity. Its very compact size make it perfect to work in small areas where walk behind models are usually used. The use of XXS makes working easier and quicker with a huge saving of time.

PLUS

The detergent water tank serves as battery compartment, allowing the housing of great capacity batteries granting continuous working time up. Large capacity shock and acid proof polyethylene tank (110 l)improves productivity avoiding frequent refilling and idle time.

Simple and intuitive controls reduce operator's training time. Easy mechanical brush plate and squeegee lifting system, for low maintenance costs. The enbloc brush plate apply a very high pressure (50 kg) to the floor, strongly and deeply removing any kind of dirt.

New control panel with digital controls and display. Digital display: with hour meter, battery charge level indicator, empty water tank level indicator, forward/reverse traction indicator. Speed control adjustment, horn, suction motor switch with delayed switch-off, brush plate lifting/lowering selector switch, brush motor switch.

The ergonomic and comfortable shape of the machine allows the operator to work effortless for a long time, improving productivity.

PLUS

The easy access to the recovery tank allows fast cleaning and sanification of the tank; the tilting tank together with a large size drain hose allow the complete emptying of the tank and the removal of any type of solid dirt. The antifoam device protects suction motor, as well as the electronic floating switch that stops suction when the tank is full.

All motors are protected by thermal breakers. The detergent water tank serves as battery compartment, allowing the housing of great capacity batteries. Battery charger and suction motor are placed the recovery tank, vacuum motor allows to drastically reduce the operating noise.

Comfort XS-R1 Up is equipped with actuators for the automatic lifting of the brush plate and squeegee. New control panel with digital controls and display. Hour meter, battery charge level indicator, empty water tank level indicator and forward/reverse traction indicator. Speed control adjustment, horn, suction motor

The ergonomic and comfortable shape of the machine allows the operator to work effortless for a long time, improving productivity. Thanks to the compact dimensions the machine can work with agility even in narrow spaces.

PLUS

New brush plate 1000 mm for increased working capacity. Implementation of the ECO MODE function for brushes and suction to reduce energy consumption and noise. Acquastop kit to allow solution tank refilling without the operator's presence. Automatic brush attachment and release.

The control electronics allows the pump to be managed according to the specific washing requirements. 1200W motor wheel for increased performance in terms of speed and climbing ability. Parking brake to ensure the necessary safety in case of steep slopes. Pressure control on the brush plate up to 130Kg.

Quick lock recovery tank cap allows for fast and easy cleaning and sanification of the tank; the tilting tank together with a large size drain hose allow the complete emptying of the tank and the removal of any type of solid dirt. The antifoam device protects suction motor, as well as the electronic floating switch that stops suction when the tank is full.

70 kg of continuous brush plate pressure with Self Leveling System to strongly and deeply removing any kind of dirt on any kind of floor. Strong oil-proof polyurethane wheels. 36V 300 Ah C5 battery box allowing continuous working time up to 5 hours. Possibility to use Li-lon batteries.

recovery tank capacity	210-240 l/55.5-63.4 gal
traction type/power	front motorwheel/900 W
RPM/pressure on the brushes	150/120 kg/246 lbs
brush motor power	1500 W
max gradient empty/full tank	10%/8%
depression/vacuum motor	1800 mmH ₂ O/550 W
dimension (cm)/weight	190x112x145/342 kg

PLUS

The unique anti foam device dramatically reduces the foam generation and prevents it from touching the suction motor, thus protecting its operation. The electronic floating switch stops suction when the tank is full. Large tank opening for fast and easy cleaning and sanification.

The strong V-shaped floor squeegee made of steel profile is widely adjustable and allows to combine the operation of the rubber blades with the high suction power, to get a perfect drying result on every surface. The special filter box retains solid debris and prevents the obstruction of the suction hose.

Easy to use thanks to the simple and user friendly controls. From the control panel the operator can adjust the maximum forward speed and the quantity of cleaning solution outflow, selecting the options most suitable to the dirt type. Job is simplified and made faster by the automatic lifting of the squeegee and of the brush plate.

Thanks to the optimal weight distribution and to the use of strong oil-proof polyurethane wheels the drive is perfect in all working conditions. The emptying of the solution water tank is quick with a simple and easy accessible mechanical tap.

RIDE ON WITH SWEEPING AND SCRUBBING SYSTEM

Comfort Duotech | 3 in 1 Sweeps | Washes | Dries |

HOW DOES DUOTECH WORK?

The collection of dust and debris during the washing of the floor takes place simultaneously with the anti-clockwise action of the cylindrical brush with adjustable pressure. The debris, together with the washing solution mixed with the dirt collected, are collected in the underlying compartment from which they are sucked up and conveyed into specific collection containers. The remaining film of water that escapes the primary collection is then sucked in by a second motor.

The collection, suction and washing solution system is the real heart of the Comfort Duotech.

The solution is atomized by the variable delivery nozzles in a uniform quantity adjacent to the washing roller. The exhaust air of the two suction motors is conveyed and blown through the side diffusers.

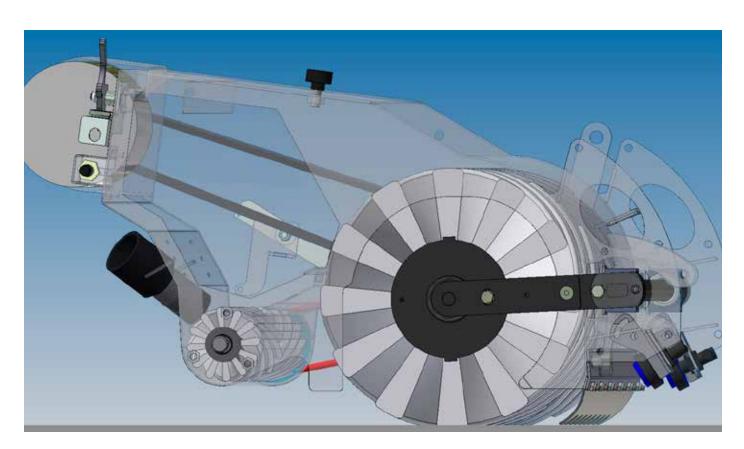

The roller, rotating anti-clockwise, together with the diffusers allow to keep a smaller quantity of solution for a long time for a superior washing and at the same time much cheaper and faster than traditional methods.

The perfect drying of the Comfort Duotech when cornering is also achieved thanks to the automatic translation of the wiper and side brushes during the steering action.

The solution consumption per minute of Comfort Duotech ranges from 500ml to 1500ml (in the case of large concentrations of dirt), compared to 1500-4500ml per minute for competing machines.

Innovation enables reduced water and detergent consumption amounting to 50% less than traditional systems with roller brushes that require multiple ducts to deliver the solution over the entire length of the brush and consequently cause high dispersion and consumption.

In the innovative patented AIR RECOVERY principle, this advantage is achieved by recovering the suction motors air return, which is conveyed and compressed in the left and right sides in front of the central brush. In this way, by using only two nozzles that deliver a

PROFESSIONAL LINE FLOOR SCRUBBER DRIERS

RIDE ON WITH SWEEPING AND SCRUBBING SYSTEM

calibrated amount of solution), it is possible to deliver the solution over the entire width of the brush and keep a constant accumulation of cleaning solution in front of the brush.

Compressed air helps preventing lateral dispersion of the water/detergent solution

Debris is conveyed upward and into the perforated drawer. Unlike the other roller scrubber dryers, the central roller turns very fast (about 950 rpm) and also conveys dirty water; this does not return to the floor but flows into a tank where a small helical brush is located. The function of this brush is conveying the muddy water to the centre where the suction pipe is located.

EVO draws the 85% of the water directly from the central brush. The only function of the rear is completing the drying for the remaining 15% of water left on the floor.

EVO allows easy access to all its components for any action required.

The tanks can easily be tipped over so that they can be washed and sanitised inside.

TO WHAT AND TO WHOM COMFORT DUOTECH IS PARTICULARLY ADDRESSED TO?

Considering the features and performances described above, Comfort Duotech is particularly suitable for cleaning very dirty surfaces, even in presence of heavy debris that need to be swept before being washed.

Comfort Duotech is also fit to clean uneven surfaces. It is apt to sweep, wash and dry areas where delicate packaging or goods packed into carton boxes are stored and operator's attention is required while working nearby.

Thanks to its great speed and work autonomy as well as its superior sturdiness and reliability, not to mention user friendli-ness, Comfort Duotech is the ideal machine for companies that provide cleaning services and often use heterogeneous staff, subject to frequent rotation and therefore not always well trained. Then in order to summarize some possible uses and identify potential users Comfort Duotech suits to:

- Warehouses and stores
- Factories, plants and workshops
- Railways stations
- Airports
- Parking areas
- Shopping malls
- Supermarkets
- Cleaning contractors

Comfort Duotech

• Comfort Duotech it is a 3 in 1 machine: it sweeps, washes, and dries • Ultra compact dimensions and great handling like a walk behind scrubber dryer, ideal for maintenance cleaning • Complete right/left side brush (1060 mm working width) • Great battery autonomy (up to 4h) thanks to the very low consumption of washing solution and tanks large capacity • Very precise detergent dosing system, proportional to the water supply, which determines a reduced number of stops and maximum use of the battery charge for the effective operation of the machine • Ergonomic steering wheel of new conception with very small turning radius (860mm) which allows it to rotate practically on itself both to the right and to the left • Self-leveling central brush that allows perfect work even on uneven surfaces • Forced air flows keep the solution always within the washing track patended • Sweeping, up to 1060mm, thanks to large diameter and intelligent side brushes (Active) which retract automatically both in the event of an impact and when cornering to allow the perfect collection of all the material. • Up to 30 L solid debris tank • Double floor drying process that allows the rear wheels to travel without slipping on wet surfaces. • Green feature: very low water consumption • Seat hight kit available • Raised seat kit standard (only code 37025-00010)

Lavor's **Fleet Management System** allows having your entire fleet of floor scrubbers and sweepers in a cloud on the Web or mobile. **FMS** shows the current status of your fleet by providing all useful, real-time data on the operator's driving status and machines' condition. A simple and intuitive dashboard shows all the information needed to measure machine efficiency and productivity:

Battery monitoring

You can view the progress of battery charging and discharging. In models equipped with a current sensor, the AH delivered power consumption can be displayed.

Work area: management of business areas

You can know the location, status and activities of the machines in real time while setting the work areas. The configuration of areas is totally customizable; in fact, a work area of any shape and size can be drawn on the map, outside of which the machine may reduce its functions.

Mobile app for real-time monitoring

A service (for consultation purposes only, for now) allows users to display the portal homepage, machine section, alarm section and map section. In addition, the **Fleet Management System** comes along with a primary appraisal that will certify the system for the purchaser, detailing the system itself.

THE TECHNOLOGIES INCLUDED OFFER MULTIPLE BENEFITS

- Increased productivity through shorter set-up times, reduced errors and downtime
- Improved quality of operation and maintenance
- Increased product competitiveness due to IOT-derived advanced features.

Is it better a petrol engine driven or a battery powered model?

The use of a petrol engine implies the presence of exhaust gasses and therefore the machine must be used only in outside areas or in areas where the operator is not exposed at such risk. The battery models can be used also inside. From the technical and qualitative point of view the sweepers do exactly the same cleaning task, but the petrol engine machine can work nonstop (it is only necessary to fill up the tank with petrol), while the electric models, once the battery is empty, need to be re-charged (an average of 8-10 hours of charge, if battery is completely worn-out)

How should the brush be?

In the sweepers,

there are two types

of bushes: the first

one rotates with a

perpendicular axle to the floor (this is the one called "side brush"). it is useful to move dirt into the collecting area and to reach dirt near borders or under edges; the second one rotates with a parallel axle to the floor (this is the one called "main brush"); it rotates counterclockwise (opposite) to the forward direction of machine and collects dirt into the collection tank. The brushes differ in the shape (round flat the "side brush" and cylindrical the "main brush"), in the type of bristles (the way bristles are arranged on the brush body), in the body material (that accordingly to options, provides resistance still in humid environment or competitive construction) and in the bristle material/diameter/shape. Generally, the stiffer and rougher the bristles are, the better they collect the heaviest dirt adherent to the floor (typically wet leaves). The more flexible and thinner the bristles are, the better they collect light and thin dirt . To have a better scraping action, it is necessary to add steel bristle to the PP ones. To collect very thin dirt, it is necessary to use only short round PP bristles. As a consequence of motorization (petrol engine or electric one) and so of indoor or outdoor use, the walk behind models have stiffer or softer bristles, to adapt in best way possible to the type of dirt typically found in the working area. How long do battery charges last?

It is impossible to determine exactly how long a battery charge

lasts.

Battery autonomy changes depending on type of surface, dirt quantity, brush type and way in which traction system is used (speed and slope).

Battery life is made up of number of charge cycles (also incomplete), if use conditions, charge and service are perfectly observed.

Manufacturing technology diversifies numbers of cycles, service needed, use/charge conditions and performances.

Which kind of battery technology?

Batteries have different prices and so it is important to know their features in order to choose the best one as far as the operator's needs or habits are concerned.

They divide into two families according to the necessity of recurrent acid solution refilling.

Acid lead batteries (Pb-Acid), need refilling, because during the charge cycle a lot of gasses are generated (for this reason a specific and aired room is necessary for safe working) and the solution vaporizes: it is necessary to add

> covered with water begin to oxidize (compromised efficiency). **VRLA** batteries (Valve Regulated Lead Acid) are airtight, this means that gasses generated during the

distilled water before the submerged

lead parts that are no more

battery: refilling is not necessary, it is possible to charge them in any room and they can be carried without risk. Acid lead batteries divide themselves into categories

charge

cycle are

rearranged

inside the

on the thickness of plate they are built depending of: if the plate is plane, the resistance to discharge is lower and few charge cycles are necessary, if the plate is tubular (or armed, recognizable opening the battery cap and verifying that the plate is made up of a lot of cylinders side by side instead of a thin leaf sheet) there is a higher resistance to discharge and to charge

VRLA batteries divide themselves depending on the condition (liquid or gel) of the acid solution (that enables energy exchange) and on the way it is kept inside the

Belt drive

The circular section grants a high resistance, stillness, reliability and it doesnt need service.

Side brush exclusion

It is a system protecting bristles during machine stop or whenever it is not necessary to use it.

• Dust vacuum system

It can be found in the main brush area. Together with the mechanical action, it conveys waste and dust that are collected into the tank through the right filters supplied.

PROFESSIONAL LINE

• Front dust vacuum system

As well as traditional vacuum system, a vacuum system can be found in the lateral brush/es collection area. Dust dispersion outside the machine is limited also before the main collection area is reached.

• Flap raise system

The main brush collection area is delimited by protections (flaps) touching the ground, better vacuum effect. Whith a big residual is possible to raise the flap collecting it rather than keep going pushing it on the floor

• Filter shaker

It clears filter from dust without touching it or opening the sweeper; the vacuum efficiency is kept at max, granting the best comfort and output for the user.

Lithium batteries as standard

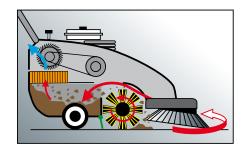

They provide more power, longer life and much faster charging times.

They are not affected by the memory effect and are lighter in weight with lower maintenance costs.

Sanitize system

Through the action of the nozzles, the sanitizing product is evenly distributed over the surface after the drying system has passed over by reducing the battery charge.

battery: if it is liquid and kept by a spongy and filamentous material, the battery is called AGM; if it is a gel solution inside a membrane, the battery is called GEL battery. On the market there are a lot of products completely different in features and value and it is very important to know the manufacturing details to couple the right battery charger (it is not sure that any battery charger is suited and get a better result than the ones in our range that are specific for our batteries) and to come up to the working expectations.

WALK BEHIND

BSW 375 ET

CHARACTERISTICS

• Industrial battery-powered sweeper for the quick, quiet and cordless intermediate cleaning of all surfaces, indoor and outdoor. • Ideal for entryways of all kinds, hallways, staircases, driveways, warehouse and office areas, airports and train stations. • Equipped with two batteries, the operation time lengthens to 90 minutes. • The powerful Lithium-Ion battery (without memory effect) with 10.8 V and 1.5 Ah allows an operation time of approx. 45 minutes per battery. • Second battery can be directly stored and carried on the machine itself. • Quick-charging unit with a charging time of only 70 minutes is included with purchase. • Large foot pedal for activation without bending over. • Main cylinder brush and side brushes can be replaced without tools. • Aluminum telescopic handle for an optimum work position. • Traceless wheels. • Enormous waste collection tray with 2 liter capacity. • Changeable bristled rim on the underside of the housing. • Low noise volume, and therefore excellent for use during business hours. • Compact, light, and easy-to-handle for any user.

	BSW 375 ET
code	39003-00001
main brush + 2 side brush width	375mm/14,76 inc
collector tank	2 lt/0,52 gal
max working capacity	1000 m²/h-10764 ft²/h
operating voltage	10,8V/1,5 Ah
max. power	25 W
voltage (charging unit)	230 V~50 Hz
dimension (cm)/weight	30x36x70/2,8 kg

WALK BEHIND

PLUS

Main cylinder brush and side brushes can be replaced without tools. Traceless wheels.

Enormous waste collection tray with 2 liter capacity. Easy to remove. Large foot pedal for activation without bending over.

Quick-charging unit with a charging time of only 70 minutes is included with purchase.

Equipped with two batteries, the operation time lengthens to 90 minutes. Second battery can be directly stored and carried on the machine itself.

STANDARD EQUIPMENT

Lavor's **Fleet Management System** allows having your entire fleet of floor scrubbers and sweepers in a cloud on the Web or mobile. **FMS** shows the current status of your fleet by providing all useful, real-time data on the operator's driving status and machines' condition. A simple and intuitive dashboard shows all the information needed to measure machine efficiency and productivity:

Battery monitoring

You can view the progress of battery charging and discharging. In models equipped with a current sensor, the AH delivered power consumption can be displayed.

Work area: management of business areas

You can know the location, status and activities of the machines in real time while setting the work areas. The configuration of areas is totally customizable; in fact, a work area of any shape and size can be drawn on the map, outside of which the machine may reduce its functions.

Mobile app for real-time monitoring

A service (for consultation purposes only, for now) allows users to display the portal homepage, machine section, alarm section and map section. In addition, the **Fleet Management System** comes along with a primary appraisal that will certify the system for the purchaser, detailing the system itself.

THE TECHNOLOGIES INCLUDED OFFER MULTIPLE BENEFITS

- Increased productivity through shorter set-up times, reduced errors and downtime
- Improved quality of operation and maintenance
- Increased product competitiveness due to IOT-derived advanced features.

GV series is suitable to degrease and sanificate any object or surface in an easy, ecological and definitive way.

GV range is made up of electric generators, vacuum steam generators, vacuum steam generators with foam system.

Ideal for food and baking industry, for private and institutional use, for pharmaceutical and mechanical industry, for dairy factories, for building sectors and so on.

Performances: temperature, steam production and pressure

The same remarks about pressure and delivery rate made for high-pressure cleaners, have to be taken into consideration also for steam generators; in this case, the important difference is the physical relationship (and so not subjective or debatable) that exists between steam pressure and its temperature: to a fixed pressure values correspond right and univocal temperature.

Knowing these values it is easy to identify the ones (like us) who show the right double relation between pressure and temperature. Outlet steam temperature (not boiler temperature, that is higher) is important because there are natural limits (about 140°C) under which it is not possible

to talk about sanification and so the purpose that led to the machine purchase (clearly wrong) could be unattended.

Is it better a steam generator or a hot water highpressure cleaner?

As far as the choice is concerned, the aspects to be considered are the analysis of the task that must be done and all the elements that make up the cost of the operation, i.e. working speed (labour cost) and (more and more important) waste treatment (waste disposal cost).

As far as the working speed is considered, it is important the whole cleaning procedure and not only the effective washing time: with the high-pressure cleaner it is not possible an indoor washing, unless there is a filled in collection system, instead it is necessary to move the washing phase outside; with the steam generator it is not necessary to move outside, it is possible to wash the part exactly where it is, because the water generated can be easily dried.

Steam at 180°C allow to degrease dirt also without the use of heavy chemical products. If they are necessary to speed up the washing task, it is very important to consider the cost of draining away dirty water. The danger of chemical products used is generally proportional to the effectiveness against

increasing dirt tenacity.

If we wash with the high-pressure cleaner we produce from 10 to 21 litres of polluted water, that must be collected and drained following the current regulation: in a single wash of a couple of hours 2,5 tons of dirty water is produced! If we wash with a steam generator, the most powerful machine produces 37 litres per hour, with the most part of the liquid that evaporates, with a two hour wash the remaining dampness and disinfecting product is very low! Analyzing all these subjects it is clear that in particular circumstances (lack of purification plant for water treatment), the steam generator is more advantageous of a high-pressure cleaner. On the other side, rinsing speed is the consequence to the delivery rate that hits dirt, so if only the washing phase is considered, high-pressure cleaner is faster. Steam can be considered water with a related dampness very, very low (superheated steam is just hot air and it doesn't have a significant mechanical action...), with an outlet temperature much higher (180°C) than a high-pressure cleaner: this means that the mechanical power is lower than the one of water, but the degreasing power of steam is much higher.

Discharge valve

Allows a complete discharge of the boiler (not possible even through gun use). In this way it is possible to remove water and limestone residual inside the boiler and from the coil surface. This valve maybe opened only when the boiler is not hot, and it is recommended to accomplish regularly.

PROFESSIONAL LINE

Unlimited autonomy

The boiler is refilled by a water pump that gets water from an external water tank. This system allows an unlimited autonomy, because it is not necessary to turn off the steam generator and wait a lower temperature to refill with water. An automatic control recharges the boiler when necessary. In some models there is an acoustic signal advising about low water level inside the water tank.

Integrated vacuum

Dirt is vacuumed inside a tank integrated in the machine

Multipurpose washable filter

It combines all the advantages of the cartridge filter but with the plus that it can vacuum both dry and wet at the same time. It can be washed with tap water.

Foam system

the machine is equipped with connection for compressed air and pressure gauge for foam cleaning. Using the lance with the hose a thick foam can be produced that will stay on the dirty components, giving more effectiveness to the detergent.

• Temperature regulator

It is possible to adjust the hot water outlet temperature.

In this way, different temperatures can be selected depending on the dirt to be removed.

• Integrated battery charger

Some models are equipped with integrated battery charger, other ones have the predisposition only. It is possible to charge batteries in different rooms, without coming back to the same place.

Integrated battery

Standard integrated battery is built with a maintenance free technology and it does not require restrictions about the place for battery charging. The non stop research allow to use always up-to-date batteries that combined with appropriate battery charger grant machine top performances.

steam production	2,6 kg/h max
boiler type/volume	Alluminium/2,4
dimension (cm)/weight	46x32x32/7,5 kg

DRY

PLUS

Lavor steam cleaner GV Kone sanitizes and sterilizes every surface with steam power, without using detergents or disinfectants. GV Kone is environmental friendly.

Steam regulation allows washing adjusting considering the surface to be treated: in this way every kind of surface has the right treatment.

The machine is user friendly and has a wide range of accessories: GV Kone is a confortable and safe daily working tool.

Steam cleaning function is perfect in shops, premises, offices as well as in household application and removes the toughest and hidden dirt while eliminating mites, germs and bacteria.

GV Etna-R 5.1

CHARACTERISTICS

• Stainless steel body AISI 304 • Ready steam warning lamp • Boiler 3 kW Stainless steel AISI 304 - Thickness 25/10 • Low level water lamp indicator • Boiler is refilled continuously • Switch for using chemicals and detergents mixed with steam • Device for cleaning hot water mixed with steam • Washable filter • Flex hose 4 m • Recovery tank capacity 64 l • Drain hose system • Steam regulation • Wheels suitable for use in food processing area • ON/OFF main switch with indicator lamp • ON/OFF boiler switch with indicator lamp • Boiler volume 4,3 l • Suction control on handle (model GV etna-R 5.1) with low tension control.

	GV Etna-R 5.1	GV Etna-R 5.1 FR
code	45004-00033	45004-00037
max steam pressure/temperature/ steam production	7 bar/165° C/3,25 kg/h	7 bar/165° C/3,25 kg/h
boiler absorbed power	3000 W/220-240V ~ 50/60Hz (Ph 1)	3000 W/220-240V ~ 50/60Hz (Ph 1)
vacuum motor absorbed power	1100 W	1100 W
column depression/air flow	22 kPa/220 m³/h	22 kPα/220 m³/h
water tank/detergent tank capacity	5 / 5	5 /5
dimension (cm)/weight	75x60x103/32 kg	75x60x103/35 kg

PLUS

Simple and intuitive control panel, quick-coupling steam gun, main ON/OFF switch with lamp, boiler ON/OFF switch with lamp, steam/detergent regulator/selector, steam flow rate regulator, steam ready warning lamp, low level water indicator lamp with buzzer, steam pressure gauge.

Unlimited autonomy thanks to the continuous power supply of the boiler, which enables water top-ups in the tank without having to stop the machine or interrupt work. Discharge pipe to quickly drain dirty water collected without removing the head.

Two electronical alarms, standby inactivity after 30 min.

Maximum safety thanks to the 2 safety thermostats, 1 pressure switch and 1 mechanical maximum pressure valve.

Recommended for hospitality, community & healthcare like buildings cleaning, spa & sport, education & community, healthcare or industry, transportation, car washers, car dealers.

Metis

CHARACTERISTICS

• Vertical burner with high thermal efficiency steel coil • Auxiliary motor for burner • Discharge valve: allows a complete discharge of the boiler • Temperature regulator: the temperature is set-up by an electronic regulator • Steam pressure gauge • Low fuel indicator • Double pipe gasoil pump • User-friendly control panel • Unit can be continually refilled • Provided with 2 outputs for simultaneous work of two different operators.

	Metis
code	45009-00001
max steam pressure/temperature	10 bar / 178° C
absorbed power	350 W / 220/240V ~ 50/60Hz (Ph 1)
steam production dry/wet	50/90 kg/h
burner type/fuel consumption	Diesel / 2,83 l/h
water tank/fuel tank capacity	18 / 18
dimension (cm)/weight	94x65x90/87,5 kg

PLUS

Metis is a portable steam generator with a diesel fuel boiler.
Unlimited autonomy thanks to nostop water tank refilling. It does not leave any residues after cleaning. Metis water saving (over 90%) compared to normal high-pressure systems. Allows sanitisation tasks thanks to the combined use of steam and pressure. The operator does not require special protective overalls and protective masks.

Ideal for maintenance cleaning and makes the bodywork of your car or motorbike shine without the risk of damaging it with the mechanical action of the high-pressure water. Ideal for eliminating stubborn grease and dirt, leaving surfaces clean and shining. Cleaning is easy, all you need to do is use the cleaning and degreasing action of the steam at high temperature and collect residues with a microfibre cloth.

PROFESSIONAL LINE

Provided with 2 outputs for simultaneous work of two different operators. Portability: it does not need to be connected neither to the water supply because it is equipped with a water tank. It is easy to move around, easy to use, and ready to use. The advantages compared to normal high-pressure washing

Ecological: It consumes very little water (90% less than normal high-pressure cleaners) and does not require connection to the water supply. Glass and delicate surfaces. Car interiors and for the most difficult parts to reach. Quick, thorough cleaning and sanitisation of mats without wetting them. It does not require a collection tank to dispose of water reflux. Thanks to the high temperature that degreases and dissolves

water tank/fuel tank capacity	25 / 25
dimension (cm)/weight	140x69x87/140 kg

PLUS

Graffiti Waster is a portable steam generator, equipped with diesel fuel boiler, allowing graffiti and dirt removal in general, thanks to the revolutionary system using steam/sand and steam/detergent mashed together. To remove all types of graffiti away from walls, buildings, floors. To restore and clean statues/monuments. Sandblasting walls andrailings.

Clean and sand blasting terracotta tiles, roofing tiles and wood. Pickle machineries and surfaces thanks to a combined use of detergents. Unlimited autonomy: thanks to nostop water tank refilling.

PROFESSIONAL LINE

Main plus in comparison to traditional sand blasting systems using air or water:

• It doesn't leave residuals at the end of cleaning task. • No water waste. • Noiseless. • Allows sanitization tasks thanks to the combined use of steam and detergents. • The operator doesn't need protective overalls and protective masks with filters. • Lack of hazardous dust that are pulled down by steam.

It doesn't need to be connected nor to water supply, because it is equipped with water tank, not to the electrical supply, because it has a diesel fuel boiler. Easy to use and always ready to use. Easy to move.

In order to complete the chemical products supply and to allow a better applicability and effectiveness, the sprayers are the perfect solution when supply wideness, use versatility and dosage saving are taken into consideration.

They are split into two different categories: pneumatic charge and continuous pneumatic charge.

Pneumatic charge sprayers need

to be connected to an air compressor to charge the tank and allow the product vaporization without the connection to the air compressor. They work at high-pressures and so they use capacious steel or stainless steel tanks to allow a greater working autonomy.

Continuous pneumatic foam sprayers need a permanent connection to an air compressor; in this way air mixes with the chemical product producing a soft and voluminous foam that persists on surfaces: with a little chemical product, it is possible to treat wider areas or tough dirt (also on ceilings, inclined and/or slippery walls).

They work at high-pressure and so they use capacious steel or stainless steel tanks to allow a greater working autonomy.

The chemical product spraying is a finishing phase of cleaning task with other machines. The choice of the right product considering the kind of cleaning task grants the best result, complying with the environment and the machine that sprays the chemical product. Our chemical products range has been conceived complying with the strictest rules protecting the environment and avoiding the indiscriminating use of products damaging the environment. The right measuring and respect of the instructions we suggest are the best balance of the economical and technical needs of each up-to-date and aware cleaning task.

--

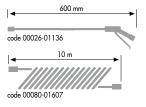

CHARACTERISTICS

- Device for dense foam production and spreading. Easy to install, it requires only compressed air connection and power supply.
- Ideal for cleaning: car body, car interiors, bathrooms, kitchens, slaughterhouses, food processing areas, health care settings, cellars.

FOAM PRODUCTION

Technology

Fields

CHEMICAL PRODUCTS FOR DENSE FOAM PRODUCTION

LC 104F

00073-00129 4x5 kg

S1

Foaming detergent for commercial vehicles

Monocomponent and alkaline detergent based on selected surfactants with a penetrating and softening action against both organic and inorganic dirt.

It acts quickly and permanently, leaves no residue, is easy to rinse, does not alter painted parts made of plastic or rubber. Thanks to its high content of sequestrants, it maintains its detergent power even in the presence of hard water. Suitable for self-service high pressure washing plants, it can also be used in washing systems with nebulizer.

LC 102F

00073-00127 4x5 kg

Alkaline foaming cleanser for food industry

Alkaline chloroactive fast-acting product, it cleans and sanitizes the surfaces and the equipment which are treated without leaving any residue. Used with a foaming nebulizer, it produces dense foam which sticks on the walls, enhancing its sanitizing action. Also suitable for floors, workbenches, equipment, etc..., it is used in dairy farms, slaughterhouses, salami factories, oil mills.

LC 103F

00073-00128 4x5 kg

S3

Foaming cleanser for hygiene facilities

Concentrated liquid detergent with acid pH. Ideal for cleansing stainless steel surfaces, it is used for cleaning and descaling all the acid-resistant surfaces. It effectively removes scale deposits, ferrous oxides and greasy surface dirt making the surfaces clean and without stains.

LC 101F

00073-00126 4x5 kg

Foaming cleanser for cloth and carpets

Product indicated for cleaning car interiors made of fabric and of carpet. Formulated with special suspending additives that have the characteristic of breaking the physicalchemical bonds existing between fiber and dirt, attracting the latter to the surface. These substances also avoid the redeposit of dirt guaranteeing excellent cleaning results. Highly foaming, it has to be used with special extraction vacuum cleaners. It brightens the colors and leaves a pleasant perfume.
